

Partnering for Environmental Responsibility

Partnership

We aim to collaborate with suppliers who share our commitment to responsible business and environmental care. We look to our suppliers to:

- Comply with all applicable environmental laws and regulations.
- Work actively to reduce negative environmental impacts, for example by using resources efficiently, preventing pollution, and managing waste responsibly.
- Inform us of any serious environmental incidents related to their operations or the products they deliver to us.
- Be transparent and willing to provide relevant information about their environmental work when requested.

Collaboration and Improvement

We believe in long-term relationships and improvement over time. We may ask key suppliers for documentation (e.g., environmental certificates, policies, or equivalent) as part of our supplier evaluations. Dialogue and cooperation are preferred over short-term decisions.
